**Sargent Aerospace & Defense Selects Quantum Control Aviation ERP Software for Its Aftermarket Services Business Unit**

SAN DIEGO, Calif., July 13, 2010 – Component Control, a premier provider of aviation management software solutions, announced today that Sargent Aerospace & Defense, a leading supplier of engineered components and aftermarket services, and an operating company within Dover Corporation's (NYSE: DOV) Industrial Products Segment, has selected Component Control's Quantum Control aviation enterprise resource planning (ERP) software as the ERP platform for its Aftermarket Services business unit.

Sargent turned to Component Control, the aviation industry's leading ERP software provider, to streamline operations at its 150,000 sq. ft. facility in Miami, Florida, formerly Sargent Avborne, which includes seven different maintenance, repair, and overhaul (MRO) shops. According to Sargent's Quantum Program Manager Kenneth Nevill, the ability to integrate the company's various MRO shops onto one aviation-based ERP platform will provide a competitive edge.

"We complete more than 26,000 repairs annually and track over 20,000 line items of inventory," said Nevill. "Quantum will provide clear visibility of parts used and repairs completed on any given component in any of our MRO shops, streamlining our operations and allowing quicker turnaround time on repairs."

Quantum Control combines manufacturing, shop floor control, inventory management, accounting, e-commerce, sales and invoicing, and other business functions into one integrated software suite.

**About Component Control**

Component Control, based in San Diego, Calif., is a leading developer and provider of aviation management software solutions. Its core product, Quantum Control, is a powerful ERP application designed specifically for the aviation industry, providing advanced aviation management support to

original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution / redistribution companies. More than 750 customers in 50 countries use Quantum Control to manage their aviation operations.
